## EDS-2008-EL Series

## 8-port entry-level unmanaged Ethernet switches with metal housing

## Features and Benefits

- 10/100BaseT(X) (RJ45 connector)
- Compact size for easy installation
- QoS supported to process critical data in heavy traffic
- IP40-rated metal housing
- -40 to $75^{\circ} \mathrm{C}$ wide operating temperature range (-T models)

## Certifications

## Introduction

The EDS-2008-EL series of industrial Ethernet switches have up to eight 10/100M copper ports, which are ideal for applications that require simple industrial Ethernet connections. To provide greater versatility for use with applications from different industries, the EDS-2008-EL Series also allows users to enable or disable the Quality of Service (QoS) function, and broadcast storm protection (BSP) with DIP switches on the outer panel. In addition, the EDS-2008-EL Series has a rugged metal housing to ensure suitability for use in industrial environments and fiber connections (Multi-mode SC or ST) can also be selected.

The EDS-2008-EL Series has a 12/24/48 VDC single power input, DIN-rail mounting, and high-level EMI/EMC capability. In addition to its compact size, the EDS-2008-EL Series has passed a 100\% burn-in test to ensure it will function reliably after it has been deployed. The EDS-2008-EL Series has a standard operating temperature range of -10 to $60^{\circ} \mathrm{C}$ with wide-temperature ( -40 to $75^{\circ} \mathrm{C}$ ) models also available.

## Specifications

## Ethernet Interface

| 10/100BaseT(X) Ports (RJ45 connector) | EDS-2008-EL: 8 <br> EDS-2008-EL-M-ST: 7 <br> EDS-2008-EL-M-SC: 7 <br> Full/Half duplex mode <br> Auto MDI/MDI-X connection <br> Auto negotiation speed |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |

| Optical Fiber |  |  |  | 100Base |  |
|  |  |  |  | ti-Mode | Single-Mode |
|  | Fiber Cable Type |  | OM1 | 50/125 $\mu \mathrm{m}$ | G. 652 |
|  |  |  | 800 MHz x km |  |
|  | Typical Distance |  |  | 4 km | 5 km | 40 km |
|  | Wavelength | Typical (nm) | 1300 |  | 1310 |

Note: When connecting a single-mode fiber transceiver, we recommend using an attenuator to prevent damage caused by excessive optical power.
Note: Compute the "typical distance" of a specific fiber transceiver as follows: Link budget $(\mathrm{dB})$ > dispersion penalty (dB) + total link loss (dB).
